June 9, 2017

Essex Regional Retirement System 491 Maple Street Suite 202 Danvers, MA 01923

Dear Members of the Board:

For the purpose of satisfying the requirements of the Government Accounting Standards Board (GASB) Statements No. 67 and 68, Stone Consulting, Inc. has prepared a set of illustrative tables and other Required Supplementary Information (RSI) based on the January 1, 2016 actuarial valuation of the Essex Regional Retirement System performed by Stone Consulting, Inc. The valuation and this report were prepared using generally accepted actuarial principles and practices and meet the parameters set by the Governmental Accounting Standards Board (GASB).

For GASB 67 the results are as of a valuation date of January 1, 2016 and a reporting date of December 31, 2016. For GASB 68 the results are as of a valuation date of January 1, 2016, a measurement date of December 31, 2016 and a reporting date of June 30, 2017. To the best of our knowledge, this report is complete and accurate, and the assumptions used represent our best estimate of anticipated experience of the system. The methods, assumptions, and plan provisions used to prepare these exhibits are consistent with those used in the funding valuation, and are outlined in the January 1, 2016 funding valuation report unless otherwise stated in this report.

We are pleased to present these exhibits. If the Essex Regional Board has any questions on the content of this report, we would be glad to respond. Please note that this report is meant to be used in its entirety. Use of excerpts of this report may result in a misleading or inaccurate understanding of the results.

The undersigned is a consultant for Stone Consulting, Inc. and a member of the American Academy of Actuaries and meets the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion contained herein.

Respectfully submitted, STONE CONSULTING, INC. Actuaries for the Plan

Lawrence B. Stone

Member, American Academy of Actuaries

GASB Statements No. 67 and 68 - Net Pension Liability

The components of the Net Pension Liability of the Essex Regional Retirement System as of December 31, 2016 were as follows:

Total Pension Liability (TPL)	\$ 788,217,715
Plan Fiduciary Net Position (FNP)	 402,929,882
System's Net Pension Liability (NPL)	\$ 385,287,832
Plan FNP as a percentage of the TPL	51.1%
Covered Payroll	\$ 133,089,526
Plan NPL as a percentage of Covered Payroll	289.50%

NOTE: Totals may not sum due to rounding

Changes to the Net Pension Liability [GASB 68, Paragraph 44]

	Total Pension Liability (a)	Plan Fiduciary Net Position (b)	Net Pension Liability (a) - (b)
Balances at beginning of Measurement Period (01/01/2016)	\$ 741,677,667	\$ 378,338,761	\$ 363,338,905
Changes for the Year:			
Service Cost	16,634,897		16,634,897
Interest	57,096,460		57,096,460
Change in benefit terms	4,350,523		4,350,523
Differences between expected and actual experience	(8,590,424)		(8,590,424)
Change in assumptions	20,216,699		20,216,699
Contributions - employer		29,463,314	(29,463,314)
Contributions - employee		12,864,436	(12,864,436)
Net investment income		26,406,995	(26,406,995)
Benefit payments, including refunds of employee contributions	(43,168,107)	(43,168,107)	0
Administrative expense		(975,517)	975,517
Other changes		0	0
Net Changes	46,540,048	24,591,121	21,948,927
Balances at end of Measurement Period (12/31/2016)	\$ 788,217,715	\$ 402,929,882	\$ 385,287,832

Update procedures were used to roll the Total Pension Liability forward from the valuation date (01/01/2016) to the measurement date (12/31/2016). [GASB Statement No. 68, Paragraph 45 a.]

Projection of the Net Pension Liability

TOTAL PENSION LIABILITY (TPL)

The Total Pension Liability at the beginning of the measurement period (01/01/2016) is equal to the TPL from the end of the end of the previous measurement period, which is then compared to the Actuarial Accrued Liability calculated as of that date. GASB Statement No. 68, Paragraph 32 requires that the AAL be calculated under the Entry Age Normal Cost Method. Any changes since the prior valuation in assumptions or plan provisions are calculated, and the remainder of any difference between the projected TPL and the Accrued Liability is recognized as "Differences between actual and expected experience".

The TPL is projected to the end of each measurement period (12/31/2016) by adding all of the changes resulting from experience, assumption changes, and changes to plan provisions. Interest is given to the TPL, Service Cost, and paid benefits, and added to the total, less the projected benefit payments for the year. Changes due to expected and actual gains on pension plan assets will be recognized over a five-year period [GASB Statement No. 68, Paragraph 33b], and liabilities arising from experience or changes in assumptions will be spread over the lifetime of the current employees [GASB Statement No. 68, Paragraph 33a].

The TPL shown is different from the AAL shown in the January 1, 2016 actuarial valuation report. This is due to a different treatment of net 3(8)(c) payments. In the funding valuation we fund the net 3(8)(c) payments on a pay-as-you-go basis. For GASB Statements No. 67 and 68 we have developed a liability amount of \$10,921,664, which we have added to the funding AAL as of January 1, 2016 to derive the Total Pension Liability. The liability is calculated by assuming that every dollar of 3(8)(c) net benefit generates the same amount of liability as a dollar of the total retirement benefit.

PLAN FIDUCIARY NET POSITION (FNP)

GASB Statement No. 68, Paragraph 20 requires that Market Value of Assets be used for the Fiduciary Net Position. Net investment income is the portion of the change in assets during the measurement period not attributed to employee/employer contributions, benefits payments, administrative expense, or other changes.

The projected Net Pension Liability (NPL) for the end of the year is the portion of the TPL not covered by the FNP. This amount is presented as a percentage of covered employee payroll. The NPL ratio for Essex Regional is 289.50% of covered payroll. In this report, covered payroll is reported as described in GASB Statement No. 82. It is a projected pensionable payroll for the measurement period.

Distribution of the Member Population

As of January 1, 2016, the following employees were covered by the benefits terms:

Inactive employees or beneficiaries currently receiving benefits	1,768
Inactive employees entitled to a return of contributions	1,030
Active employees	<u>2,738</u>
TOTAL	5,536

Pension Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions [GASB 68, Paragraph 44 h.]

	Deferred Outflows Of Resources	Deferred Inflows Of Resources
Differences between expected and actual experience	\$ O	\$ (6,938,419)
Changes of assumptions	16,328,873	0
Net difference between projected and actual earnings on pension plan investments	16,877,544	0
Total	\$ 33,206,417	\$ (6,938,419)

Year Ending December 31, *	Recognition
2017	\$ 7,550,003
2018	7,550,003
2019	7,916,226
2020	2,804,601
2021	447,164
Thereafter	0

^{*}The years are based on measurement date. For GASB 68, the year ending December 31, 2017 is Fiscal 2018.

Development of Exhibits

DISCOUNT RATE

Projections were made using a discount rate assumption of 7.75%, which is consistent with the assumption used in the valuation. One of the objectives of the provisions introduced by GASB 68 is to examine how benefit payments and plan contributions and investment earnings interact on a cash flow basis. GASB requires that these amounts be calculated with Market Value of Assets and using the Entry Age Normal cost method.

Projected contributions for each year are the sum of the projected normal cost, the amortization of the unfunded liability, administrative expense, and other benefit costs such as 3(8)(c) payments. The amortization bases and periods are consistent with those seen in the valuation report. Administrative expenses are increased by 4.00% per year.

Essex Regional's Fiduciary Net Position was projected to be available to make all future benefit payments of current active and inactive employees. Thus, the long-term expected rate of return on investments was applied for all benefit periods when calculating the Net Pension Liability.

The long-term rate of return which was used to develop the discount rate of 7.75% includes the effect of inflation (not subtracted out as in the real rates of return). It is based on a combination of expected rates of return on the mix of current and expected investments over a long-term period. These expectations are based on current market conditions, historical experience and future expectations. It assumes a rebalancing of assets on an ongoing basis as well as a constant monitoring of asset allocation and manager performance.

GASB Statement No. 67, Paragraph 30 b. 4 requires that a return rate for the measurement period be developed using the market value of assets at the beginning of the measurement period, along with monthly cash flows. This has been done for the 2016 calendar year, and is shown on the following page and on page 11.

Calendar Year	2016
Money-Weighted Rate of Return	7.80%

Discount Sensitivity [GASB 68, Paragraph 42 g.]

The following presents Essex Regional's Net Pension Liability calculated at the valuation discount rate of 7.75%, as well as at discount rates one percent higher (8.75%) and one percent lower (6.75%).

Fiscal Year	1% Decrease	Current Discount Rate	1% Increase		
	(6.75%)	(7.75%)	(8.75%)		
2017	\$ 471,944,872	\$ 385,287,832	\$ 321,176,656		

Long-Term Expected Real Rate of Return

The long-term expected real rate of return reflects the expected rate of return on plan assets minus the expected rate of inflation. Note that the discount rate includes the effect of inflation. The long-term real rate of return removes the effect of inflation on the return amounts. It is a long-term assumption and is meant to reflect a best estimate of future experience, based on the expected asset allocation. The allocation percentages are based on information provided by the Essex Regional Retirement System and NEPC. The real rates of return below are based on 30-year return estimates provided by NEPC, adjusted using a 3.00% inflation assumption.

Asset Class	Target Allocation	Long-Term Expected Real Rate of Return (Geometric Average)
Global Equity	38.17%	-
Large Cap Equities	13.84%	4.37%
Small/Mid Cap Equities	3.34%	4.61%
International Equities	15.27%	4.69%

	Total Pension Expense	\$ 44,492,076

^{*} Notes shown on following page. Amounts are based on the following dates:

CHANGES IN METHODS, ASSUMPTIONS, AND PLAN PROVISIONS

The assumptions and methods used to generate these exhibits are consistent with those used in the January 1, 2016 actuarial valuation of Essex Regional performed by Stone Consulting, Inc. unless otherwise noted. Any gains or losses resulting from future changes will be recognized over the average service lifetime of plan members.

RESULTS BY EMPLOYER

Exhibits are provided beginning on page 12 which provide individual results for the various employers that make up the Essex Regional Retirement System. The NPL was allocated to individual employers in the following manner: liabilities were developed to reflect the present value of remaining ERI payments by the various employers, the total of these liabilities being subtracted from the total NPL, and the remainder being allocated to individual employer in the same proportion as the FY2017 contribution. The ERI liabilities were allocated directly to the employers with remaining ERI payments. Per GASB 68, the change in proportionality from FY2016 to FY2017 of the individual employers' NPL and deferred inflows and outflows need to be allocated to the individual employers. This is calculated on page 18. These amounts are then recognized over the average working lifetime, which is 5.2 years. The contribution excess generated by Federal Grants has been allocated to the employers receiving those grants.

Valuation date: January 1; Measurement date: December 31; Reporting date: following June 30

NOTES

- A. See the RSI schedule of changes to the net pension liability, on page 1.
- B. Events that impact the total pension liability are assumed to happen evenly throughout the period. In addition, the amount of interest on the total pension liability is calculated using an interest rate equal to the discount rate that was used to determine the service cost. The amount is determined as follows:

	Amount for	Portion of	Interest	Interest on the Total
Description	Period	Period	Rate	Pension Liability
	(a)	(b)	(c)	(a) x (b) x (c)
Beginning total pension liability	\$ 741,677,667	100%	7.75%	\$ 57,480,019
Service cost	16,634,897	100%	7.75%	1,289,205
Benefit payments	(43,168,107)	50%	7.75%	(1,672,764)
Total interest on the net pension liabilit		\$ 57,096,460		

- C. Differences between expected and actual experience recognized in the current period in accordance with paragraph 33a of Statement 68. For the detailed calculation of this amount, see the schedules on page 9.
- D. Assumption and plan provision changes recognized in pension expense in the current period in accordance with paragraph 33a of Statement 68. For detailed calculation of these amounts, see the schedule on page 9.
- E. Changes in the amounts invested are assumed to occur evenly throughout the period. In addition, the amount of projected earnings on pension plan investments is calculated using the assumed rate of return on pension plan investments as of the beginning of the period. The amount is determined as follows:

Description	Amount for Period (a)	Portion of Period (b)	Projected Rate of Return (c)	Projected Earnings (a) x (b) x (c)
Beginning plan fiduciary net position	\$ 378,338,761	100%	7.75%	\$ 29,321,254
Employer contributions	29,463,314	50%	7.75%	1,141,703
Employee contributions	12,864,436	50%	7.75%	498,497
Benefit payments, including refunds of employee contributions	(43,168,107)	50%	7.75%	(1,672,764)
Administrative expense and other	(975,517)	50%	7.75%	(37,801)
Total projected earnings				\$ 29,250,889

F. Differences between projected and actual earnings recognized in the current period in accordance with paragraph 33b of Statement 68. For detailed calculation of this amount, see the schedule on page 9.
